ABOUT ME

- I'm a Professional Problem solver I want to fill my C.V with this word because I'm a really a good one, and I'm not saying that to toot my own horn I'm a really good one I'm saying that because I am always able to find the problem faster than senior developers the last 8 months I've been coding for more than 13 hours a day that's why I'm a very skillful programmer.
- I always develop my skills and search for new technology to learn.

EXPERIENCES I GAINED BY BUILDING ADVANCED PROJECTS

Amazon Super Store website

- I didn't deploy it yet because it's not done yet there are some features I wanna add because It's gonna be my website but sure when you see the video I've provided below you'll make sure I'm a good full-stack developer.
- check the preview for the project from here the link: (Super Store)
- I gained valuable experience in web development, including front-end and back-end technologies.
- Proficiency in TypeScript, Redux, Node.js, and Express for building the application's client and server side.
- Experience in integrating third-party APIs such as PayPal and Stripe for payment processing and implementing authentication and authorization features for enhanced security.
- Developed strong problem-solving and debugging skills and the ability to work independently through the project.

My Notes App application

- It's a simple project but it has a special functionality of saving user Privacy also every user can save his data related to his section in the database and no one else can see it.
- I didn't deploy it yet Because I built it with typescript and I need to buy a host i don't have money
- here's a preview of the project a simple video showing some of the features of the project: the design is mine
the link : (My Notes App)

MY LIFE PHILOSOPHY

""Studying is the only way to reach success and achieve your goals, so do not hesitate to invest in yourself and your time, and do not stop studying until you reach what you want to achieve. Always remember that everything you do today will affect your future, so make studying and learning a part of your daily life to achieve your future

MOST PROUD OF

Creating An Amazon Clone:
I built a Real superstore with all the functionality that might be needed in building any website.

Become a Professional Problem Solver:
There are many reasons to say I'm a good Problem Solver; I'm a really good one, I'm so smart, I have the ability to find errors in a very short time, and I always search for better Alternatives.

Mastering Typescript:
At the beginning, I found it challenging, especially given the relatively small size of the TypeScript developer community..

Mastering the American Accent
I improved my English a lot so I was able to learn from foreigners.

STRENGTHS

| Typing speed of 60 wpm | Eye for detail |

Problem Solving   Speed Learning

Hard Working   Innovation

typeScript   JavaScript   Redux

React.js   Express   Node.js

Bootstrap   SASS   html   CSS

Finance DashBoard

- I used Artificial intelligence with type script
- It's a complete DashBoard I will deploy it as soon I have money.

My old Protfolio

- I created it before I become a FUll-Stack Developer
  the link : 🌐 amr-portfolio.web.app

Building websites with more functionality

- I have a passion for writing high-quality and efficient code, and I always strive to improve my skills.
- While watching tutorials on application development, I found that I was able to simplify the code compared to what was being presented in the tutorial, I could find errors faster than them.
- This is because I have developed my own coding style through practice and experience.
- I am committed to continuously learning and improving my skills to write efficient and maintainable code.

EXPERIENCE

React Developer

Electronic systems for software programming

📅 March 1 – Onging   📍 June 1 – end

From Home
- It was a short training but I learned a lot.
- Learned how to work in a team.
- I was always doing more than what I was asked to do.

SKILLS I HAVE RECENTLY ACQUIRED.

Strong knowledge of TypeScript

Strong knowledge of Node.js and Express

Mastering Redux With React And Typescript
